MABAS

BANK AUTOMATION SOLUTIONS

Mabas SBM 95

The banknote banding machine - Mabas SBM 95 is a compact, lightweight, durable and with the function of the ejector and the printing. SBM-95 is the only machine in the world with printing function on banding tape which includes:

- Name of the Bank
- Name of the branch office
- Name and surname of the Operator
- Time of a bundling specifying the date, hour, minute, and even the second. Additionally you can print any other necessary information, also if you connect the SBM-95 to a counting machine, it can print on banding tape what the machine has calculated
- Value of the denomination and the number of banknote in each bundle

WEIGHT	11 kg (without paper reel)
DIMENSION	length x width x height 400 x 112 x 245 mm
PRINTER CARTRIDGE	HP51645A(42 ml)

“PRINTING CAPABILITY”

Printing function on banknotes allows you to reach the total control over the process and in case of theft or fraud, money loss or counterfeit banknote in the batch, you can easily find out where this batch has come from and can detect the person who committed this misdoing through the camera recordings. Printing function also helps you to standardize the cash processing mechanisms throughout the bank.
